Go fish!

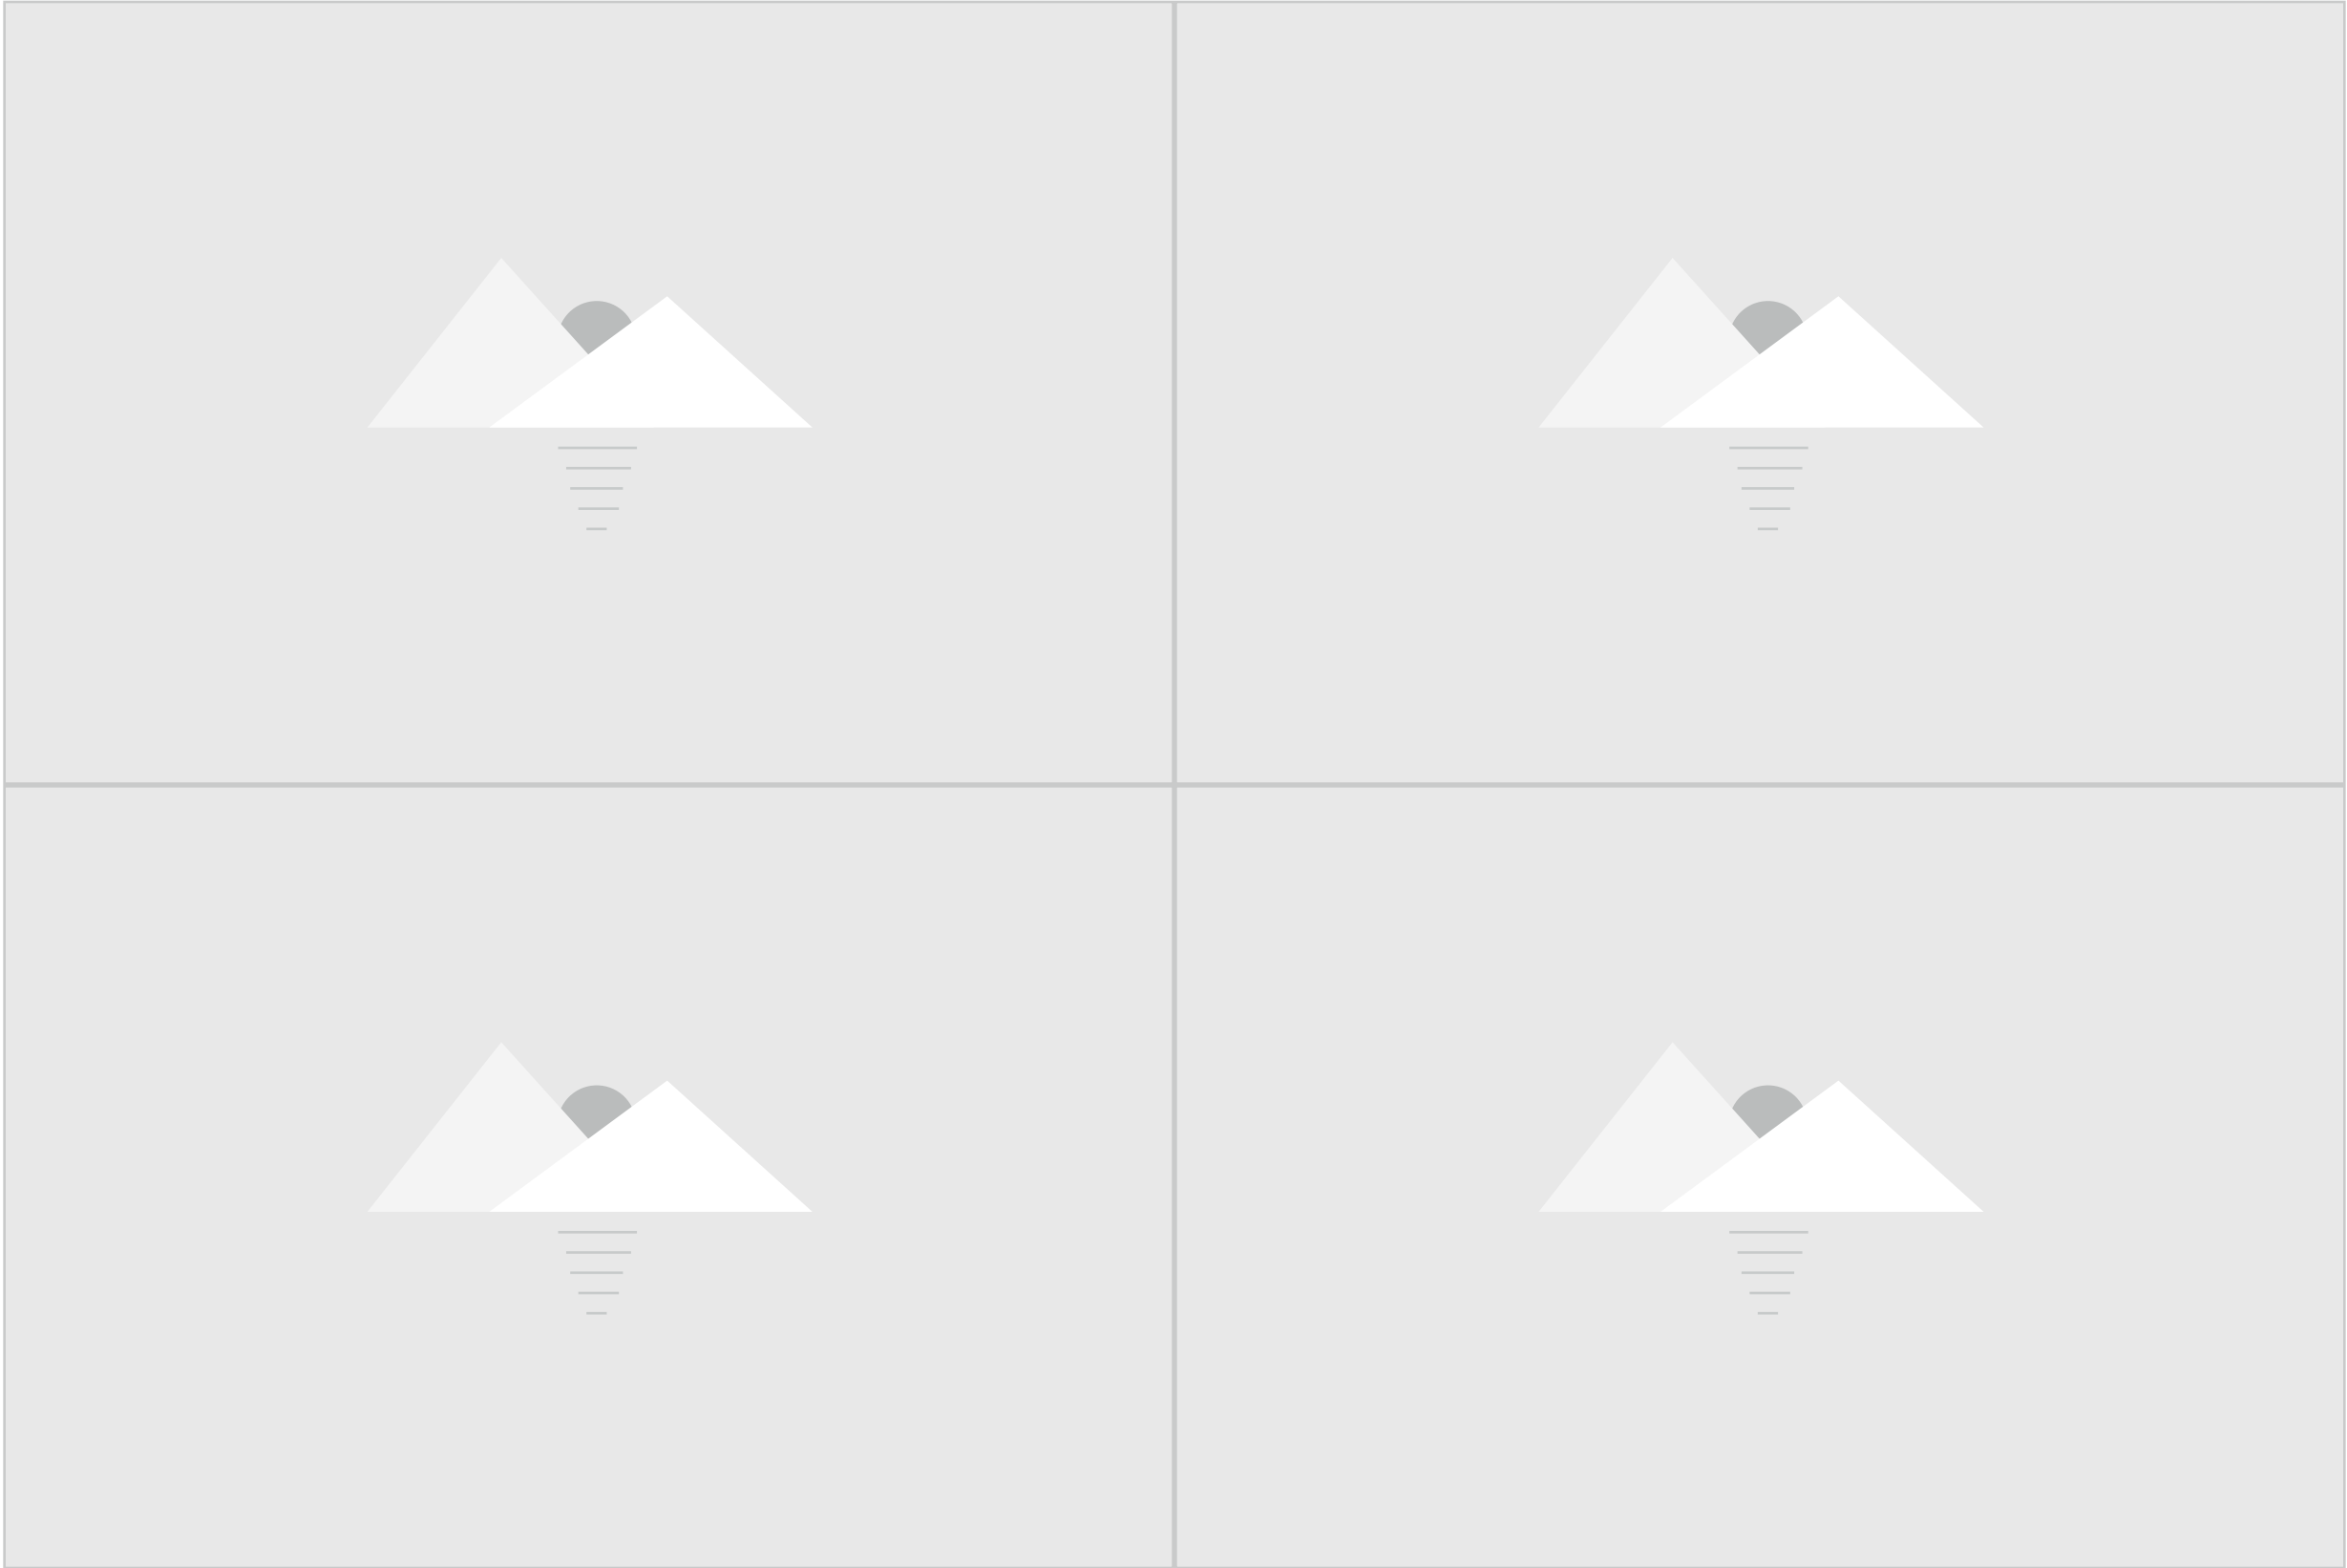

(Or some other randomly generated campy pun in cursive)
Users can choose a Top, Bottom, Outerwear and Shoe item. Clicking on an item takes the user to the Clothing view, where they can choose what kind of shirt, shoe, etc. Choosing one of these items routes the user to the Outfit view, which will have the programmatically generated outfit

Closet Feed

User banana built a conservative outfit

User banana built a hip outfit

User banana built a casual outfit

My Closet

Users can click on “My closet” to view their saved outfits
Users can click on items in the closet

Outfits

FISH AGAIN

Outfit view has the
Four programmatically
Generated outfits in each
Category: Casual, Hip,
Conservative, and Business
Casual. Clicking on an outfit
Expands it to the whole Div,
or opens a modal. Users
Can choose the outfit,
Close the window
And choose another,
or click “Fish again”
To go back to the clothing
Picker

My Closet

My Closet

Sort by Category ▼

This closet view says “my Closet” if the user clicked “My Closet” in the bottom Right, and “User Banana’s Closet” if they clicked on Someone’s closet feed. The Closet populates the most Recent items first, however Users can also sort by the Four categories. A rating System would be a cool Stretch, using hearts of course.

My Closet

Users can click on “My closet” to
view their saved outfits
Users can click on items in the closet
